

Intent:

- To provide challenges through a progression of transferable knowledge and skills to enable pupils to feel more confident using a range of ICT throughout various topics. This will also build pupils resilience when dealing with a range of situations and encourage creativity.

Implementation:

- To encourage pupils to use the appropriate software across a range of subjects when using ICT to improve confidence and build on resilience, preparing pupils for the range of new software pupils will explore in the future.
- To make learning fun through a range of activities and games.
- To provide opportunities for pupils to engage in catch up sessions
- Use of peer assessment and problem-solving activities to develop pupils thinking skills

Impact:

- For pupils to actively engage in lessons with a positive attitude – less concerns for being out of class
- Improved assessment results throughout the year leading to pupils leaving with higher qualifications.
- Improved tolerance for the subject and opportunity to build on relationships.
- A higher percentage and rise in pupil's attendance to lessons
